ABOUT THIS SYSTEM

What Is COMMA?

COMMA is a modern Point of Sale (POS) and restaurant management system designed for cafes and lounges. It helps you manage orders, tables, menu items, payments, and track business performance.

Who Uses COMMA?

- **Managers:** Oversee operations, manage staff, and view reports
- **Cashiers:** Create orders, process payments, and print receipts
- **Customers:** Order from tables using QR code without logging in
- **Administrators:** Configure the entire system and manage user accounts

Main Benefits

1. **Easy Ordering** - Customers order directly from their table using a QR code
2. **Fast Payment** - Accept multiple payment methods (cash, card, wallet)
3. **Automatic Receipts** - Generate and print receipts instantly
4. **Business Insights** - View detailed reports and analytics
5. **Table Management** - Track which tables are occupied and their orders
6. **Menu Control** - Easily update prices, items, and availability
7. **Multi-Language** - Supports English and Arabic

Problems It Solves

- Reduce order errors by letting customers order directly
 - Speed up payment processing with multiple payment options
 - Eliminate paper order slips with digital tracking
 - Understand business performance with detailed analytics
 - Manage staff shifts and track revenue
-

QUICK START GUIDE

For New Users (5-minute overview)

If you are a Cashier:

1. Login with your username and password
2. Go to Dashboard
3. Click "Create Order" to add a new order
4. Select items from the menu
5. Process payment when ready
6. Receipt prints automatically

If you are a Manager:

1. Login to your account
2. View the Dashboard to see daily metrics
3. Go to Tables to manage restaurant seating
4. Check Reports for business performance
5. Adjust Settings as needed

If you are a Customer (using QR code):

1. Scan the QR code at your table

2. Browse the menu by category
 3. Select items and quantities
 4. Choose variants and add-ons if available
 5. Add items to your cart
 6. Enter your name (optional)
 7. Click "Place Order"
 8. Wait for your food to arrive
-

GETTING STARTED

Logging In

1. Open the COMMA application
2. Enter your **Username** in the first field
3. Enter your **Password** in the second field
4. Click the **Sign In** button
5. You will be taken to your dashboard

Demo Accounts Available:

- The login page shows demo account options for testing

After First Login

When you first login, you'll see:

- A welcome message
- Your assigned role (Admin, Manager, or Cashier)
- The main dashboard with overview metrics
- A sidebar menu with available options

Changing Your Password

To change your password (if available):

1. Look for your profile menu (usually in the top-right corner)
2. Select "Settings" or "Account Settings"
3. Find the "Change Password" option
4. Enter your current password
5. Enter your new password twice
6. Click "Save"

Logging Out

1. Click your profile icon in the top-right corner
 2. Select "Logout" from the menu
 3. You will be returned to the login page
-

DASHBOARD OVERVIEW

What You See on the Dashboard

The main dashboard displays important business metrics at a glance:

Status Cards (Top of Page)

Total Orders

- Shows how many orders you've created today
- Click to view all orders

Total Revenue

- Shows total money made today in ILS (Israeli Shekel)
- Includes all completed and paid orders

Average Order Value

- Shows the average amount spent per order
- Helps track customer spending patterns

Items Sold

- Total number of menu items sold today

Total Customers

- Number of unique customers today

Active Orders

- How many orders are currently being prepared

Charts & Graphs

Daily Revenue Chart

- Visual representation of money made each day this week

- Helps compare daily performance

Orders by Category

- Shows which food categories are most popular
- Updates in real-time as orders are added

Most Ordered Items

- Bar chart showing your best-selling menu items
- Useful for knowing what's popular

Order Status Distribution

- Visual breakdown of orders in each status
- Pie chart showing open, preparing, ready, completed

Recent Orders Table

Shows your most recent orders with:

- Order ID
- Table number (if dine-in)
- Number of items
- Total amount
- Current status
- Time placed

Click any order to see full details and make changes.

Bottom Sections

Top Performing Tables

- Which tables generate the most revenue
- Helps with seating strategy

Top Selling Items

- Your most profitable and popular items
- Useful for inventory planning

Refreshing the Dashboard

- Dashboard updates automatically every few seconds
- Click the refresh button (↻) to update immediately
- Clearing your browser cache helps if data seems outdated

NAVIGATION GUIDE

Main Sidebar Menu

The sidebar on the left shows all available sections:

Menu Item	Description	Available To
Dashboard	Overview with metrics	All staff
Tables	Manage restaurant seating	Manager, Admin
Orders	Create and manage orders	Cashier, Manager, Admin
Menu	Add/edit menu items	Manager, Admin
Receipts	View receipt history	Cashier, Manager, Admin
Shifts	Manage work shifts	Manager, Admin
Analytics	Business performance charts	Manager, Admin
Reports	Detailed business reports	Manager, Admin
Settings	Configure the business	Admin

Top Navigation Bar

Left side:

- COMMA logo and system name
- Current page name

Right side:

- Language toggle (English/العربية)
- Your username
- Logout button

Using the Menu

1. Click any menu item to go to that section
2. The current page is highlighted in the menu
3. If you don't see a menu option, you don't have permission to access it
4. Sub-menu items appear with a small arrow (>)

USER ROLES & PERMISSIONS

Three Types of Users

COMMA has three user roles with different permissions:

1. CASHIER

Responsibilities:

- Create orders for customers
- Process payments (cash, card, wallet)
- Print receipts
- View order history
- Manage basic table status

Can Do:

- ✓ Create new orders
- ✓ Add items to orders
- ✓ Remove items from orders
- ✓ Process payments
- ✓ Print and export receipts
- ✓ View receipts
- ✓ View dashboard overview

Cannot Do:

- ✗ Create or edit menu items
- ✗ Create tables
- ✗ Close shifts
- ✗ Access settings
- ✗ Create user accounts
- ✗ View detailed reports

2. MANAGER

Responsibilities:

- Oversee daily operations
- Manage staff and shifts
- Create and update menu items
- Manage tables and seating
- Generate and review reports
- Handle customer issues

Can Do:

- ✓ All Cashier permissions
- ✓ Create and edit menu items
- ✓ Create and edit tables
- ✓ Manage categories and add-ons
- ✓ Open and close shifts
- ✓ View all reports
- ✓ Access settings
- ✓ View advanced analytics

Cannot Do:

- ✗ Create user accounts
- ✗ Delete users
- ✗ Access system administration
- ✗ Change business fundamental settings

3. ADMIN

Responsibilities:

- Full system administration
- User account management
- System configuration
- Troubleshooting
- Backup and security

Can Do:

- ✓ Everything in the system
- ✓ Create and delete user accounts
- ✓ Create and delete menu items
- ✓ Create and delete tables
- ✓ Access all settings
- ✓ View system logs
- ✓ Configure business settings
- ✓ Create staff shifts

Cannot Do:

- ✗ (Admins have full access)

COMPLETE FEATURES GUIDE

FEATURE 1: CREATE & MANAGE ORDERS

Purpose

Orders are how you record what customers want to buy. Every sale starts with creating an order.

Who Can Access

- Cashiers can create orders for customers
- Managers can create orders
- Administrators have full access

Step-by-Step: Creating a New Order

Step 1: Go to Orders

1. Click "Orders" in the sidebar menu
2. You'll see a list of existing orders
3. Click the "Create Order" or "+" button

Step 2: Choose Order Type

When creating an order, select one of three types:

- **Dine-In:** Customer eating at a table
- **Takeaway:** Customer taking food to-go
- **Delivery:** Delivering to a customer's address

Step 3: Select or Create Table/Customer

For **Dine-In** orders:

- Select the table number from the list
- System shows if table is occupied or available

For **Takeaway** or **Delivery**:

- Enter the customer's name
- For delivery, enter the delivery address (optional)

Step 4: Add Items

1. Click "Add Item" button
2. Find the item in the menu
3. Select the item
4. Choose quantity (how many)
5. Select variants if available (e.g., size: small/medium/large)
6. Choose add-ons if available (e.g., extra cheese, no sauce)
7. Add notes if needed (e.g., "no onions")
8. Click "Add to Order"
9. Repeat for each item you want to add

Step 5: Review Items

- See all items in the order
- Item prices and total appear
- Can remove items if needed by clicking the X

Step 6: Apply Discount (Optional)

1. Click "Add Discount" if available
2. Enter discount type (fixed amount or percentage)
3. Enter discount value
4. Click "Apply"

Step 7: Confirm Order

- Review everything
- Click "Save Order" or "Confirm"
- Order is now in the system

Step 8: Process Payment

- Click "Checkout"
- Select payment method:

- Cash
- Card
- Wallet
- Online
- Enter amount received (for cash)
- System calculates change
- Click "Process Payment"

Step 9: Receipt

- Receipt generates automatically
- Can print immediately
- Can export as PDF
- Customer receives copy

Expected Results

- Order appears in the orders list
- Status shows as "Open"
- Table is marked as occupied (for dine-in)
- Kitchen receives order notification
- Receipt is available to print

Example Scenario

Maria is a cashier. A customer at Table 5 wants:

- 2 Espressos (medium)
- 1 Croissant
- 1 Sandwich (no onions)

She:

1. Clicks Orders → Create Order
2. Selects "Dine-In"
3. Chooses Table 5
4. Adds 2 Espressos (medium)
5. Adds 1 Croissant
6. Adds 1 Sandwich with note "no onions"
7. Reviews total: 75 ILS
8. Customer pays with cash (100 ILS)
9. System shows change: 25 ILS
10. Receipt prints
11. Customer gets receipt and order placed

Tips for Success

- Double-check items before saving
- Ask customers about add-ons and preferences
- Use notes field for special requests
- Always confirm payment amount before processing
- Print receipt immediately for customer satisfaction
- For dine-in, verify table number is correct

Common Mistakes

- X Forgetting to add all items
- X Wrong table selection
- X Wrong payment amount entered
- X Not selecting correct variants/sizes
- X Creating order without adding items

Troubleshooting

Problem: Can't find a menu item

- Solution: Check if item is marked as "Active" in menu settings
- Solution: Search by item name if available
- Solution: Ask manager if item is currently available

Problem: Order won't save

- Solution: Make sure at least one item is added
- Solution: Check if all required fields are filled
- Solution: Refresh page and try again

Problem: Can't process payment

- Solution: Verify payment amount is entered
- Solution: Check internet connection
- Solution: Try different payment method

FEATURE 2: GUEST ORDERING VIA QR CODE

Purpose

Let customers order directly from their table using their phone. No staff needed to take the order.

Who Can Access

- Any customer with a phone that can scan QR codes
- No login required
- Available 24/7

Step-by-Step: For Customers Using QR Code

Step 1: Scan the QR Code

1. Customer sits at the table
2. Finds the QR code (on table, wall, or receipt)
3. Opens phone camera or QR code app
4. Points at QR code
5. Clicks the link that appears

Step 2: Browse the Menu

1. Menu appears on their phone
2. Menu is organized by category (Drinks, Food, Desserts, etc.)
3. Customer can:
 - Scroll through items
 - Search by name
 - Filter by category
 - View item descriptions and prices

Step 3: Select Items

1. Click on an item to see details
2. See item name, description, and price
3. Choose quantity (how many)
4. Select size or variant if available
 - Example: Coffee size (Small/Medium/Large)
5. Select add-ons (extras to add)
 - Example: Extra shot, vanilla syrup, etc.
6. Add special request notes (optional)
 - Example: "Extra hot", "No whipped cream"
7. Click "Add to Cart"

Step 4: Continue Shopping

- Add more items by repeating Step 3
- Or click "View Cart" to see selected items
- In cart, can:
 - Increase/decrease quantity
 - Remove items
 - See running total

Step 5: Checkout

1. When done shopping, click "Place Order"
2. Enter customer name (optional)
3. Add special requests for whole order (optional)
4. Review total amount
5. Click "Place Order" button
6. Confirmation message appears

Step 6: Wait for Food

1. Customer gets confirmation on their phone
2. Kitchen receives the order
3. Order appears in staff's screens
4. Customer waits at table
5. Staff brings food when ready

Expected Results

- Order appears in kitchen/staff screens immediately
- Order total is calculated automatically with correct pricing
- Extras and add-ons are included in total
- No errors from miscommunication
- Fast service since order is prepared immediately

Example Scenario

Ahmed sits at Table 3. He:

1. Scans the QR code with his phone
2. Sees the menu in English
3. Searches for "Espresso"
4. Clicks on "Espresso" item
5. Selects "Medium" size
6. Adds "Extra Shot"
7. Adds notes "No foam"

8. Clicks "Add to Cart"
9. Continues adding a pastry
10. Reviews cart total: 42 ILS
11. Enters his name "Ahmed"
12. Clicks "Place Order"
13. Gets confirmation
14. Waits for staff to bring coffee

Tips for Success

- Place QR codes where they're easy to see
- Make sure QR codes link to the correct menu
- Test QR codes regularly to ensure they work
- Provide clear instructions if customers ask for help
- Monitor orders coming in to manage kitchen flow

Common Issues for Customers

- QR code won't scan
 - Solution: Check QR code is not damaged
 - Solution: Try different phone camera angle
 - Solution: Use dedicated QR code app
- Menu won't load
 - Solution: Check internet connection
 - Solution: Try refreshing the page
 - Solution: Clear browser cache
- Order won't place
 - Solution: Make sure at least one item is selected
 - Solution: Check internet connection
 - Solution: Try again after waiting a few seconds

For Staff: Managing QR Orders

When you see an order from QR:

1. It will be marked as "Self Order" or "From Table"
2. Check table number for dine-in
3. Follow normal order fulfillment process
4. Bring food to correct table
5. Collect payment if not already paid via QR

FEATURE 3: RECEIPT MANAGEMENT

Purpose

Receipts prove that a customer paid for their order. They can be printed, emailed, or exported as PDF.

Who Can Access

- Cashiers can print and view receipts
- Managers can view and manage all receipts
- Administrators have full access

Step-by-Step: Print a Receipt After Order

Immediately After Payment:

1. After customer pays, receipt screen appears
2. Click "Print" button
3. Printer dialog opens
4. Select your printer from the list
5. Click "Print" to send to printer
6. Printer produces receipt

To Find an Old Receipt:

1. Go to **Receipts** in the sidebar
2. You'll see a list of all receipts with:
 - Receipt number
 - Table number
 - Order details
 - Total amount
 - Payment method
 - Date and time

Using Filters to Find Receipts:

1. Use the search fields at the top:
 - **Receipt #:** Enter receipt number to find it
 - **Table:** Enter table number
 - **Payment Method:** Select cash, card, wallet, or online
 - **Date Range:** Select From and To dates

- Click "Search"

2. Results show matching receipts

Viewing Receipt Details:

1. Click "View" button on any receipt
2. A detailed receipt opens showing:
 - Customer name
 - Table number
 - Items ordered with prices
 - Subtotal
 - Tax amount
 - Service charge (if any)
 - Discounts applied
 - Final total
 - Payment method
 - Receipt number
 - Timestamp

Printing a Receipt from History:

1. Find the receipt in the list
2. Click "Print" button
3. Printer dialog opens
4. Select printer and print

Exporting Receipt as PDF:

1. View the receipt (click View)
2. Click "Export as PDF" or "Download PDF"
3. File saves to your computer's Downloads folder
4. Can email this PDF to customer

Expected Results

- Receipt prints immediately on thermal printer
- Receipt shows all order details clearly
- Totals are accurate
- Receipt can be emailed to customer
- Receipt is permanently stored in system

Example Scenario

Layla is a cashier. After completing an order:

1. Receipt appears on screen with items
2. She clicks "Print"
3. Receipt prints on the printer
4. She gives receipt to customer
5. Later, customer calls to ask about their receipt
6. Layla goes to Receipts page
7. Searches for the date range and table number
8. Finds the receipt
9. Clicks "Export as PDF"
10. Emails PDF to customer

Tips for Success

- Check printer is turned on before printing
- Load receipt paper regularly
- Keep receipt rolls in stock
- Verify printer settings match your paper size
- Test print periodically to ensure quality

Common Mistakes

- ✗ Forgetting to print before closing register
- ✗ Printing to wrong printer
- ✗ Losing paper receipts
- ✗ Wrong receipt number entered when searching

Troubleshooting

Problem: Receipt won't print

- Solution: Check if printer is turned on
- Solution: Verify printer is connected to network
- Solution: Check if receipt paper is loaded
- Solution: Try printing test page from printer

Problem: Can't find a receipt

- Solution: Use correct date range in filter
- Solution: Search by different criteria (table number instead of date)
- Solution: Check if receipt might be under different time period

Problem: Printed receipt is faded

- Solution: Check receipt paper quality
- Solution: Clean printer heads (check printer manual)
- Solution: Ensure paper is not too old

FEATURE 4: TABLE MANAGEMENT

Purpose

Manage your restaurant's tables, track which are occupied, and view their orders.

Who Can Access

- Managers can create, edit, and manage tables
- Administrators have full access
- Cashiers can view table status but cannot create/edit

Step-by-Step: Create a New Table

1. Click **Tables** in the sidebar
2. Click **"Add Table"** button
3. Fill in the form:
 - **Table Number:** The table's number (e.g., 1, 2, 3... or A1, B2, etc.)
 - **Capacity:** How many people can sit (e.g., 4, 6, 8)
 - **Status:** Set to "Available"
 - **Location:** Where is the table? (e.g., "Window", "Outdoor", "Corner")
 - **Notes:** Any special info (e.g., "High chairs available", "Wheelchair accessible")
4. Click **"Save"**

Expected Results

- Table appears in the tables list
- Table can now be assigned to orders
- Customers can scan QR code at the table to order

Editing a Table

1. Go to **Tables**
2. Find the table in the list
3. Click **"Edit"** button
4. Change any details (capacity, location, notes)
5. Click **"Save"**

Table Statuses

Each table shows its current status:

Status	Meaning	What You Should Do
Available	Table is empty and ready for customers	Customers can be seated
Occupied	Customers are currently using the table	Don't seat anyone else here
Reserved	Table is reserved for future customers	Don't seat others here

Viewing Table Orders

1. Go to **Tables**
2. Click on a table name
3. See the current order (if any) for that table
4. See previous orders at that table
5. Can click on any order to see details

Example Scenario

Manager Fatima needs to add a new table:

1. Clicks **Tables**
2. Clicks **"Add Table"**
3. Enters:
 - Table Number: 8
 - Capacity: 4 people
 - Status: Available
 - Location: Outdoor
 - Notes: "Great view of street"
4. Clicks **Save**
5. Table 8 now appears in the list

Tips for Success

- Organize tables logically (1-10, A-H, etc.)
- Update capacity based on actual seating
- Mark special features in notes
- Mark tables as reserved early if needed
- Keep location descriptions simple and clear

Common Mistakes

- **X** Creating tables with same number
- **X** Assigning wrong capacity
- **X** Forgetting to update status when customers leave
- **X** Creating too many tables

Troubleshooting

Problem: Can't find a table in the list

- Solution: Scroll down in the table list
- Solution: Search/filter if available
- Solution: Verify table number you're looking for

Problem: Table status is wrong

- Solution: Click Edit and change status manually
- Solution: Update status when order is completed

FEATURE 5: MENU MANAGEMENT

Purpose

Manage what you sell - items, prices, categories, and add-ons.

Who Can Access

- Managers can create and edit menu items
- Administrators have full access
- Cashiers can view menu only

Main Menu Components

Your menu consists of:

1. **Categories** - Groups of items (Drinks, Food, Desserts)
2. **Menu Items** - Individual products you sell
3. **Variants** - Choices within an item (size, flavor)
4. **Add-ons** - Extra items customers can add (extra shot, extra toppings)

Step-by-Step: Create a Menu Category

1. Click **Menu** in the sidebar
2. Look for **Categories** section
3. Click **"Add Category"**
4. Enter:
 - **Category Name:** e.g., "Espresso Drinks"
 - **Description:** Optional description
5. Click **"Save"**

Step-by-Step: Create a Menu Item

1. Click **Menu** in the sidebar
2. Click **"Add Item"**
3. Fill in:
 - **Item Name (English):** e.g., "Cappuccino"
 - **Item Name (Arabic):** e.g., "كابتشينو"
 - **Category:** Choose from existing categories
 - **Price:** Base price in ILS
 - **Description:** What is it? (optional)
 - **Image:** Upload a photo (optional)
 - **Active:** Toggle to make available or unavailable
4. Click **"Save"**

Adding Variants to an Item

Variants are different options for the same item (e.g., sizes).

1. Find the item in the menu
2. Click **"Edit"**
3. Look for **Variants** section
4. Click **"Add Variant"**
5. Enter:
 - **Variant Name:** e.g., "Medium"
 - **Price Adjustment:** How much more? (e.g., +5 for medium, +10 for large)
6. Click **"Save"**

Adding Add-ons to an Item

Add-ons are extras customers can purchase (e.g., extra chocolate, extra shot).

1. Find the item in menu
2. Look for **Add-ons** section
3. Click **"Add"** or **"Select Add-ons"**
4. Choose which add-ons apply to this item
5. Click **"Save"**

Creating Add-ons

1. Click **Menu** in sidebar
2. Find **Add-ons** section
3. Click **"Add Add-on"**
4. Enter:
 - **Add-on Name:** e.g., "Extra Shot"
 - **Price:** How much extra? e.g., 5 ILS
 - **Active:** Toggle to enable/disable
5. Click **"Save"**

Managing Item Availability

To make an item temporarily unavailable:

1. Click **Menu**
2. Find the item
3. Click **"Edit"**
4. Toggle **"Active"** to OFF
5. Click **"Save"**
6. Item won't appear in customer menus

To make it available again:

1. Toggle **"Active"** back to ON
2. Save

Example Scenario

Manager Rami wants to add a new coffee drink:

1. Clicks Menu
2. Clicks "Add Item"
3. Enters:
 - Name (EN): "Flat White"
 - Name (AR): "فلات وايت"
 - Category: "Espresso Drinks"
 - Price: 25 ILS
 - Description: "Espresso with steamed milk"
 - Uploads item image
4. Clicks Save
5. Adds variants:
 - Small: +0 ILS
 - Medium: +3 ILS
 - Large: +6 ILS
6. Adds available add-ons (extra shot, vanilla, caramel)
7. Item now appears in customer menus

Tips for Success

- Use consistent naming across languages
- Upload clear product images
- Set realistic prices
- Keep descriptions short
- Regularly review and update menu
- Group similar items in same category
- Test items appear correctly in customer view

Common Mistakes

- ✗ Items marked as inactive when they should be active
- ✗ Prices inconsistent between variants
- ✗ Forgetting to save changes
- ✗ Add-ons assigned to wrong items
- ✗ Missing Arabic names

Troubleshooting

Problem: Item doesn't appear in customer menu

- Solution: Check if item is marked as "Active"
- Solution: Verify category is correct
- Solution: Refresh customer app/browser

Problem: Wrong price shows

- Solution: Edit item and verify base price

- Solution: Check variant price adjustments
- Solution: Clear browser cache

Problem: Can't find an item

- Solution: Search by name if available
 - Solution: Filter by category
 - Solution: Scroll through complete list
-

FEATURE 6: PAYMENTS & INVOICES

Purpose

Process customer payments accurately using various payment methods.

Who Can Access

- Cashiers can process payments
- Managers can view payment history
- Administrators have full access

Payment Methods Supported

Your system accepts four payment types:

1. **Cash** - Customer pays in physical money
2. **Card** - Credit/debit card payment
3. **Wallet** - Digital wallet (Apple Pay, Google Pay, etc.)
4. **Online** - Online payment processing

Step-by-Step: Process a Payment

For Cash Payments:

1. Order total is displayed
2. Customer gives you cash
3. Click "Process Payment"
4. Select "**Cash**" as payment method
5. Enter amount customer gave you
6. System calculates change
7. Verify change amount with customer
8. Click "**Confirm Payment**"
9. Receipt generates automatically

For Card Payments:

1. Select "**Card**" as payment method
2. Customer provides card (or uses contactless)
3. Enter amount to charge (usually order total)
4. Device processes the card
5. Receipt generates automatically
6. Give receipt to customer

For Wallet/Online Payments:

1. Select payment method
2. Follow on-screen instructions
3. Customer completes payment on their device
4. System confirms payment
5. Receipt generates

Handling Refunds

If a customer needs their money back:

1. Find the original order/receipt
2. Click "**Refund**" or similar option
3. Select payment method (refund to same method)
4. Enter refund amount
5. Click "**Process Refund**"
6. System records the refund
7. Money is returned to customer

Viewing Payment History

1. Go to **Receipts** or **Orders**
2. Filter by date range
3. All payments show payment method used
4. Click on receipt to see payment details

Example Scenario

Cashier Amira needs to process payment:

1. Order total: 85 ILS
2. Customer gives cash (100 ILS)
3. Amira clicks "Process Payment"
4. Selects "Cash"

5. Enters 100
6. System shows: Change = 15 ILS
7. Amira gives customer 15 ILS change
8. Receipt prints
9. Transaction complete

Tips for Success

- Always verify payment amount before confirming
- Give correct change for cash
- Keep receipts as proof of payment
- Reconcile cash drawer at end of shift
- Monitor multiple payment methods for trends

Common Mistakes

- ✗ Entering wrong payment amount
- ✗ Forgetting to give change
- ✗ Processing payment twice
- ✗ Wrong payment method selected

Troubleshooting

Problem: Card payment fails

- Solution: Check internet connection
- Solution: Try card again
- Solution: Suggest different payment method
- Solution: Contact payment provider support

Problem: Wrong amount refunded

- Solution: Process another refund for difference
- Solution: Document the issue
- Solution: Report to manager

Problem: Payment won't process

- Solution: Refresh page
- Solution: Try payment again
- Solution: Restart payment terminal if using one

FEATURE 7: SHIFT MANAGEMENT

Purpose

Track work shifts, monitor revenue per shift, and manage staff schedules.

Who Can Access

- Managers can open and close shifts
- Administrators have full access
- Cashiers cannot open shifts but work during them

Step-by-Step: Open a Shift

At the Start of Your Work Day:

1. Go to **Shifts** in the sidebar
2. Click **"Open Shift"**
3. Fill in:
 - **Opening Cash:** How much cash are you starting with? (e.g., 500 ILS for change)
 - **Date/Time:** Automatically filled with current date/time
4. Click **"Open"**

Expected Results:

- Shift is now active
- All orders from now until shift closes will be tracked
- System monitors cash flow
- Revenue is calculated

Working During Your Shift

While your shift is open:

- All orders you create are tracked
- Every payment goes toward shift revenue
- Cash drawer shows running total
- All receipts are logged

Step-by-Step: Close a Shift

At the End of Your Work Day:

1. Go to **Shifts**
2. Find your open shift

3. Click "**Close Shift**" button
4. System shows:
 - Opening cash amount
 - All orders during shift
 - Total revenue
 - Total refunds
 - Expected cash in drawer
5. Manually count your cash drawer
6. Enter **Actual Cash Count** (the real amount)
7. System calculates difference if any
8. Click "**Confirm and Close**"

Report Generated:

- Shift summary created
- Revenue breakdown shown
- Cash reconciliation recorded
- Report available for review

Viewing Shift History

1. Go to **Shifts**
2. View all shifts with:
 - Date and time
 - Revenue total
 - Orders count
 - Opening and closing cash
 - Status (open/closed)
3. Click on a shift to see detailed report

Example Scenario

Manager Hassan opens and closes a shift:

Morning:

1. Goes to Shifts
2. Clicks "Open Shift"
3. Enters: Opening Cash = 500 ILS
4. Clicks Open
5. Shift begins tracking

During Day:

- Creates 15 orders
- Total revenue: 1,200 ILS
- Cash payments: 800 ILS
- Card payments: 400 ILS

Evening:

1. Clicks "Close Shift"
2. System shows expected cash: 1,300 ILS (500 opening + 800 cash payments)
3. Hassan counts drawer: 1,295 ILS (5 ILS variance)
4. Enters 1,295
5. Clicks Close
6. Shift report generated
7. Data saved for accounting

Tips for Success

- Open shift at exact start time
- Count opening cash carefully
- Monitor shift throughout day
- Close shift at exact end time
- Count cash accurately
- Document any discrepancies
- Review shift reports regularly

Common Mistakes

- ✗ Forgetting to open shift
- ✗ Wrong opening cash amount
- ✗ Closing shift too early or too late
- ✗ Inaccurate cash count
- ✗ Not reconciling discrepancies

Troubleshooting

Problem: Can't open shift

- Solution: Check if a shift is already open
- Solution: Verify you have manager permissions
- Solution: Refresh page and try again

Problem: Shift won't close

- Solution: Make sure all orders are completed
- Solution: Check internet connection
- Solution: Try closing again

Problem: Cash doesn't match

- Solution: Review all transactions during shift
- Solution: Document the difference
- Solution: Report to manager
- Solution: Check for missed refunds

FEATURE 8: REPORTS & ANALYTICS

Purpose

Understand your business performance with detailed reports and charts.

Who Can Access

- Managers can view all reports
- Administrators have full access
- Cashiers may have limited access

Types of Reports Available

1. **Daily Reports** - What happened today
2. **Weekly Reports** - Full week summary
3. **Monthly Reports** - Entire month analysis

Step-by-Step: View a Daily Report

1. Click **Reports** in sidebar
2. Click **Daily Reports** or **Generate Daily Report**
3. Select **Date** you want to review
4. Click "**Generate**" or "**View**"
5. Report appears showing:

Daily Report Contents:

Section	Shows
Revenue	Total money made today
Orders	How many orders completed
Customers	Number of unique customers
Average Order	Average amount per order
Payment Methods	Cash vs Card breakdown
Top Items	Best selling products
By Hour	Revenue broken down by hour
Charts	Visual graphs of data

Step-by-Step: View a Weekly Report

1. Click **Reports** → **Weekly Reports**
2. Select **Week** and **Year**
3. Click "**View**"
4. Report shows:
 - Daily breakdown for each day
 - Total for the week
 - Comparison to previous week
 - Trends and patterns
 - Top performing days

Step-by-Step: View a Monthly Report

1. Click **Reports** → **Monthly Reports**
2. Select **Month** and **Year**
3. Click "**View**"
4. Report shows:
 - Complete month data
 - Daily, weekly, and total summaries
 - Year-to-date comparison
 - Trends and growth
 - Detailed breakdowns

Filtering Reports

Most reports allow filtering:

Available Filters:

- **Date Range:** From date to date
- **Payment Method:** Show only cash, or only cards, etc.
- **Item Category:** Show sales of specific categories
- **Table/Location:** Filter by area of restaurant

Exporting Reports

To save a report:

1. View the report
2. Click **"Export PDF"** or **"Download"**
3. PDF downloads to your computer
4. Can email to managers or accountants
5. Can print for records

Analyzing Report Data

Key Metrics to Watch:

Metric	What It Means	Why It Matters
Total Revenue	Money made in period	Know if business is profitable
Order Count	Number of orders	Busy days help staffing
Average Order Value	Amount per order	See if customers spend more
Top Items	Best sellers	Stock more of popular items
Peak Hours	Busiest times	Schedule staff accordingly
Payment Methods	Cash vs card usage	Plan for payment terminals

Example Scenario

Manager Yasmine reviews daily report:

1. Clicks Reports → Daily Reports
2. Selects today's date
3. Views report showing:
 - Revenue: 3,500 ILS
 - Orders: 42
 - Average Order: 83 ILS
 - Peak hour: 2:00 PM (8 orders)
 - Top item: Cappuccino (18 sold)
 - Payment: 60% cash, 40% card
4. Clicks "Export PDF"
5. Saves to computer
6. Emails to owner

Tips for Success

- Review reports daily to spot trends
- Compare week-to-week for growth
- Watch for seasonal patterns
- Export reports monthly for accounting
- Share reports with staff to motivate
- Use data to plan menu changes
- Monitor payment method trends

Common Mistakes

- ✗ Not reviewing reports regularly
- ✗ Making decisions on incomplete data
- ✗ Ignoring unusual trends
- ✗ Not exporting for backup

Troubleshooting

Problem: Report shows \$0 revenue

- Solution: Check date is correct
- Solution: Verify orders were completed
- Solution: Check if orders were paid

Problem: Numbers seem wrong

- Solution: Verify the date range selected
- Solution: Check if filters are limiting results
- Solution: Compare with shift records
- Solution: Ask manager to verify

Problem: Can't export to PDF

- Solution: Check internet connection
- Solution: Try different browser
- Solution: Clear browser cache
- Solution: Try again in a few minutes

FEATURE 9: SETTINGS & CONFIGURATION

Purpose

Customize how the system works for your business.

Who Can Access

- Administrators control main settings
- Managers may adjust some settings
- Cashiers cannot access settings

Business Information Settings

Navigate to **Settings** → **Business Information**

You can update:

- **Restaurant Name:** Official name of your business
- **Phone Number:** For customer contact
- **Email:** For business correspondence
- **Address:** Physical location
- **City/Region:** Where you're located
- **Currency:** What currency you use (currently ILS)
- **Owner Name:** Who owns the business
- **Tax ID:** Your business tax number
- **License Number:** Business license number

Receipt Settings

Navigate to **Settings** → **Receipt Settings**

Customize receipts with:

- **Business Name on Receipt:** What appears at top
- **Business Address:** Address on receipt
- **Business Phone:** Phone number on receipt
- **Tax Number:** Tax ID on receipt
- **Logo URL:** Image of your logo
- **Header Text:** Custom text above items
- **Footer Message:** Custom message below items
- **Currency Symbol:** What symbol for prices (₪)
- **Receipt Prefix:** Receipt number prefix (e.g., "RCT-")
- **Paper Size:** 58mm or 80mm thermal paper
- **Show Tax Breakdown:** Display tax details
- **Show Service Charge:** Display service charges
- **Auto Print:** Automatically print after payment

Currency Settings

Current Currency: ILS (Israeli Shekel)

The system displays all prices and totals in ILS throughout:

- Menu items
- Orders
- Receipts
- Reports
- All financial displays

Tax & Service Charge Settings

Navigate to **Settings** → **Business Settings**

Set standard rates:

- **Tax Percentage:** Standard tax rate (e.g., 15%)
- **Service Charge:** Service charge if applicable (e.g., 0%)

These automatically apply to all orders unless manually adjusted.

Example Scenario

Admin Omar customizes settings:

1. Goes to Settings → Business Information
2. Updates:
 - Restaurant Name: "COMMA Café & Lounge"
 - Phone: "+972-2-123-4567"
 - Address: "Downtown, Jerusalem"
 - Currency: ILS
3. Saves
4. Goes to Settings → Receipt Settings
5. Adds:
 - Logo URL: "https://..."
 - Header: "Thank you for visiting!"
 - Footer: "See you tomorrow!"
 - Tax Percentage: 17%
6. Saves

Now all receipts show the custom information.

Tips for Success

- Keep business information current
- Update tax rates when laws change
- Customize receipts to match branding
- Test receipt settings before using
- Review settings periodically
- Ensure all information is accurate

Common Mistakes

- *X* Entering wrong tax rate
 - *X* Leaving placeholder text
 - *X* Wrong currency symbol
 - *X* Forgetting to save changes
-

WORKFLOWS GUIDE

Complete Workflows: Step-by-Step Examples

WORKFLOW 1: COMPLETE DINE-IN ORDER PROCESS

This is what happens from customer arrival to departure:

Step 1: Customer Sits Down

- Server seats customer at Table 5
- Server may put menu at table or give to customer
- If QR code available, customer can scan to order

Step 2: Customer Orders via QR Code

1. Customer scans table's QR code
2. Browses menu on their phone
3. Selects items, quantities, variants, add-ons
4. Enters name (Ahmed)
5. Clicks "Place Order"
6. App shows confirmation

Step 3: Kitchen Receives Order

- Order appears on kitchen display
- Order shows: Table 5, Ahmed, all items with special requests
- Kitchen begins preparing

Step 4: Food is Prepared

- Kitchen staff cook all items
- Items are plated professionally
- Quality is checked

Step 5: Food is Served

- Server brings food to Table 5
- Verifies items match order
- Asks if customer needs anything else
- Customer begins eating

Step 6: Payment

- Customer finishes eating
- Server brings bill/receipt
- Customer can pay via:
 - Cash given to server
 - Card given to server
 - Phone wallet at table (if available)

Step 7: Cashier Processes Payment

1. Cashier opens order for Table 5
2. Clicks "Checkout"
3. Verifies final amount
4. Selects payment method (cash)
5. If cash: enters amount given, confirms change
6. Clicks "Process Payment"
7. System generates receipt

Step 8: Receipt Generated

- Receipt prints on thermal printer
- Shows all items, prices, tax, total
- Shows payment method
- Shows date and time
- Shows receipt number

Step 9: Payment Completed

- Server returns to Table 5
- Gives receipt to customer
- Gives change (if applicable)
- Thanks customer

- Clear table

Step 10: Table is Cleared

- Table status changes to "Available"
- Dishes are cleared
- Table is cleaned
- Table is ready for next customers

Expected Results:

- Revenue recorded in system
 - Receipt on file for accounting
 - Shift revenue updated
 - Table available for new customers
 - Customer has proof of purchase
-

WORKFLOW 2: COUNTER ORDERING FOR TAKEAWAY

For customers taking food to-go:

Step 1: Customer Orders at Counter

- Customer arrives at counter
- Reviews menu on wall or menu board
- Tells cashier what they want

Step 2: Cashier Creates Order

1. Goes to Orders
2. Clicks "Create Order"
3. Selects "Takeaway" order type
4. Enters customer name (e.g., "Sara")
5. Adds items customer requested
6. Reviews total: 95 ILS

Step 3: Payment

1. Asks customer: "Will that be cash or card?"
2. Customer gives cash (100 ILS) or card
3. Cashier selects payment method
4. For cash: enters 100, confirms change = 5 ILS
5. Clicks "Process Payment"

Step 4: Receipt Prints

- Receipt shows:
 - "TAKEAWAY"
 - Items ordered
 - Total: 95 ILS
 - Payment: Cash
 - Receipt number

Step 5: Order Sent to Kitchen

- Order appears on kitchen screen
- Kitchen sees "TAKEAWAY"
- Kitchen prepares items
- Packs in boxes/bags

Step 6: Ready for Customer

- Kitchen signals order is ready
- Cashier calls customer name
- Customer comes to counter

Step 7: Hand Off

- Cashier verifies order with customer
- Gives bagged order
- Gives receipt
- Gives change (if applicable)
- Thanks customer

Step 8: Customer Leaves

- Customer departs with food
- Table not needed
- No table status update

Expected Results:

- Faster transaction (no table management)
 - Customer gets food quickly
 - Revenue recorded immediately
 - Receipt in system for records
-

WORKFLOW 3: COMPLETE PAYMENT & RECEIPT WORKFLOW

All the steps from final payment to receipt in hand:

Step 1: Order Complete, Ready to Pay

- Food is eaten
- Server brings check
- Customer ready to pay
- Total amount: 85 ILS

Step 2: Payment Selection

Customer can pay via:

- **Cash** - Physical money
- **Card** - Credit/debit card
- **Wallet** - Apple Pay, Google Pay
- **Online** - Payment app

Step 3: Cashier Processes Payment

For Cash:

1. Click "Process Payment"
2. Select "Cash"
3. Customer gives 100 ILS
4. Enter 100 in amount field
5. System calculates change: 15 ILS
6. Click "Confirm"
7. Give change to customer

For Card:

1. Click "Process Payment"
2. Select "Card"
3. Customer gives card or uses contactless
4. Terminal processes
5. Receipt prints

Step 4: System Generates Receipt

- Receipt prints automatically
- Shows:
 - Items ordered
 - Individual prices
 - Subtotal: 85 ILS
 - Tax (if applicable)
 - Service charge (if applicable)
 - Total: 85 ILS
 - Payment method: Cash
 - Receipt number: RCT-20250604-0042
 - Time: 14:35
 - Thank you message

Step 5: Receipt Given to Customer

- Server gives warm receipt to customer
- Customer has proof of payment
- Customer can reference for returns

Step 6: Receipt Saved in System

- Receipt stored in database
- Searchable by:
 - Receipt number
 - Date
 - Table number
 - Amount
- Can be reprinted anytime
- Can be exported as PDF

Step 7: Records Updated

- Shift revenue updated
- Daily sales updated
- Payment method tracked
- Reports updated

Expected Results:

- Customer has receipt
- Money accounted for
- Transaction recorded
- Data available for reporting
- Payment completed

WORKFLOW 4: SHIFT START TO SHIFT END

Complete day for a manager:

Step 1: Arrival (8:00 AM)

- Manager arrives at work
- Opens COMMA system
- Logs in

Step 2: Open Shift

1. Goes to Shifts
2. Clicks "Open Shift"
3. Counts opening cash: 500 ILS
4. Enters 500 as opening cash
5. Clicks "Open"
6. Shift is now active

Step 3: Throughout the Day

- System tracks all orders
- All payments recorded
- All receipts generated
- Revenue accumulates
- Staff work under this shift

Step 4: Monitor Throughout Day

Manager periodically:

- Checks Dashboard for metrics
- Monitors order flow
- Checks revenue total
- Ensures quality
- Manages staff

Step 5: End of Day (8:00 PM)

- Stop taking new orders
- Complete any remaining orders
- Ensure all payments processed
- Prepare to close

Step 6: Close Shift

1. Goes to Shifts
2. Finds open shift
3. Clicks "Close Shift"
4. System shows:
 - Opening cash: 500 ILS
 - Orders during shift: 47
 - Total revenue: 2,350 ILS
 - Expected cash: 2,200 ILS (500 + cash payments)
 - Card payments: 150 ILS

Step 7: Count Actual Cash

- Manager counts physical cash drawer
- Actual count: 2,195 ILS
- Difference: -5 ILS (small variance)

Step 8: Enter Closing Count

1. Enters "2,195" in actual cash field
2. System notes variance: -5 ILS
3. Clicks "Close Shift"

Step 9: Review Shift Report

1. Report generates showing:
 - All orders for the day
 - Revenue breakdown
 - Top items sold
 - Payment method breakdown
 - Peak hours
 - Cash reconciliation

Step 10: Shift Complete

- Shift is now closed
- All data locked
- Cannot edit orders
- Data available for analysis
- Ready for next shift

Expected Results:

- Complete record of business day
 - All revenue accounted for
 - Cash reconciled
 - Data for accounting
 - Management insights
-

Other Common Workflows

QUICK REFERENCE TABLE

Workflow	Time	Steps	Key Output
Simple Cash Order	5 min	Create order → Add items → Payment → Receipt	Receipt, revenue recorded
Complex Order	15 min	Create → Add 10+ items → Apply discount → Payment → Receipt	Same plus discount tracking
QR Table Order	3 min	Customer scans → Selects items → Pays → Receipt	No staff interaction needed
Refund	5 min	Find original order → Process refund → Money returns	Refund receipt, reduced revenue
Menu Update	10 min	Edit item → Change price → Save → Available immediately	Updated menu across all devices
Daily Report	2 min	Select date → Generate → View → Export PDF	Insight into business performance

SETTINGS GUIDE

All Customizable Settings

Business Information Settings

Location: Dashboard → Settings → Business Information

What You Can Set:

Setting	Purpose	Example
Restaurant Name	Official business name shown everywhere	COMMA Café & Lounge
Phone Number	For customer contact	+972-2-123-4567
Email Address	Business email	info@comma-cafe.com
Street Address	Physical location	25 Main Street
City	City where you operate	Jerusalem
Postal Code	ZIP/postal code	9100001
Tax ID	Government tax number	123456789
Business License	License number	BL-2024-001
Owner Name	Owner's full name	Ahmed Al-Rashid
Owner Email	Owner's email	ahmed@comma-cafe.com
Currency Code	What currency used	ILS (Israeli Shekel)

Receipt Settings

Location: Dashboard → Settings → Receipt Settings

Customize Receipt Appearance:

Setting	What It Controls	Example
Business Name on Receipt	Name at top of receipt	COMMA CAFÉ
Business Address	Address shown on receipt	25 Main Street, Jerusalem
Business Phone	Phone shown on receipt	+972-2-123-4567
Tax Number on Receipt	Tax ID shown on receipt	123456789
Logo URL	Business logo on receipt	[image URL]
Header Text	Custom message at top	"Welcome to COMMA!"
Footer Message	Custom message at bottom	"Thank you for visiting!"
Currency Symbol	Symbol used for money	₪ (Shekel sign)
Receipt Prefix	Prefix for receipt numbers	RCT- or RC-
Paper Size	Printer paper width	80mm (standard)
Show Tax	Display tax calculation	On/Off
Show Service Charge	Display service charge	On/Off
Show Waiter Name	Waiter's name on receipt	On/Off
Show Table Number	Table # on receipt	On/Off
Auto Print Receipt	Print when order completes	On/Off

Financial Settings

Location: Dashboard → Settings → Financial Configuration

Set Automatic Charges:

Setting	Purpose	Default
Tax Percentage	Automatic tax on all orders	17%
Service Charge	Service charge percentage	0%
Discount Type	Fixed or percentage discounts	Percentage

Payment Methods

Location: Dashboard → Settings → Payment Options

Enable/Disable Payment Methods:

- ☒ Cash
- ☒ Card
- ☒ Wallet
- ☒ Online

(Check boxes to enable, uncheck to disable)

Hours of Operation

Location: Dashboard → Settings → Business Hours

Set Operating Hours:

- Monday: 8:00 AM - 8:00 PM
- Tuesday: 8:00 AM - 8:00 PM
- (etc. for all days)

REPORTS & ANALYTICS

Understanding Dashboard Metrics

Main Dashboard Widgets Explained:

Total Orders

- **What it shows:** Number of completed orders today
- **Example:** 42 orders
- **Why it matters:** Busy days need more staff
- **How to use:** Identify peak days for scheduling

Total Revenue

- **What it shows:** Total money made today
- **Example:** 3,500 ILS
- **Why it matters:** Know if day was profitable
- **How to use:** Track daily performance trends

Average Order Value

- **What it shows:** Average amount per order
- **Example:** 83 ILS
- **Why it matters:** Understand customer spending
- **How to use:** Identify if average is increasing/decreasing

Items Sold

- **What it shows:** Total menu items sold
- **Example:** 125 items
- **Why it matters:** Inventory planning
- **How to use:** Stock popular items more

Revenue Chart

- **What it shows:** Money made each day of week
- **Example:** Line graph showing daily totals
- **Why it matters:** See patterns and trends
- **How to use:** Compare weeks and identify best days

Orders by Category

- **What it shows:** Sales breakdown by food type
- **Example:** Drinks = 45%, Food = 40%, Desserts = 15%
- **Why it matters:** Know what customers want most
- **How to use:** Adjust menu based on popularity

Most Ordered Items

- **What it shows:** Top 10 best-selling items
- **Example:** 1. Cappuccino (35), 2. Espresso (28)
- **Why it matters:** Know bestsellers
- **How to use:** Ensure bestsellers always in stock

Order Status Breakdown

- **What it shows:** Orders by status (Open, Preparing, Ready, Completed)
- **Example:** Pie chart showing status distribution
- **Why it matters:** Understand workflow efficiency
- **How to use:** Identify bottlenecks in process

TROUBLESHOOTING

Common Issues and Solutions

Login Issues

Problem: Can't login

- **Solution 1:** Verify username and password are correct

- **Solution 2:** Check Caps Lock is not on
- **Solution 3:** Refresh page and try again
- **Solution 4:** Clear browser cookies
- **Solution 5:** Contact administrator

Problem: Forgot password

- **Solution:** Contact your manager or administrator
- **Solution:** They can reset your password
- **Solution:** You'll need to set new password on next login

Problem: Account locked

- **Solution:** Too many wrong login attempts
- **Solution:** Wait 15 minutes before trying again
- **Solution:** Contact administrator to unlock

Payment Issues

Problem: Payment won't process

- **Solution 1:** Check internet connection
- **Solution 2:** Verify payment amount entered
- **Solution 3:** Try payment again
- **Solution 4:** If card: check card is not expired
- **Solution 5:** Try different payment method

Problem: Receipt won't print

- **Solution 1:** Verify printer is on
- **Solution 2:** Check printer is connected
- **Solution 3:** Verify receipt paper is loaded
- **Solution 4:** Check for paper jams
- **Solution 5:** Restart printer and try again

Problem: Wrong amount charged

- **Solution 1:** Process refund for difference
- **Solution 2:** Document transaction
- **Solution 3:** Report to manager
- **Solution 4:** Check receipt for accuracy

Order Issues

Problem: Can't create order

- **Solution 1:** Verify you're logged in
- **Solution 2:** Check if you have permission to create orders
- **Solution 3:** Refresh page
- **Solution 4:** Try creating simple order first

Problem: Item won't add to order

- **Solution 1:** Check if item is marked active
- **Solution 2:** Check if item is in correct category
- **Solution 3:** Refresh page
- **Solution 4:** Contact manager

Problem: Order total is wrong

- **Solution 1:** Verify item prices
- **Solution 2:** Check tax percentage
- **Solution 3:** Verify quantities
- **Solution 4:** Check discounts applied

Technical Issues

Problem: Page loads slowly

- **Solution 1:** Check internet speed
- **Solution 2:** Close other browser tabs
- **Solution 3:** Clear browser cache
- **Solution 4:** Refresh page
- **Solution 5:** Try different browser

Problem: Data not updating

- **Solution 1:** Refresh page (F5)
- **Solution 2:** Clear browser cache
- **Solution 3:** Logout and login again
- **Solution 4:** Check internet connection

Problem: Strange page layout

- **Solution 1:** Zoom browser to normal (100%)
- **Solution 2:** Try different browser
- **Solution 3:** Clear browser cache
- **Solution 4:** Update browser to latest version

FREQUENTLY ASKED QUESTIONS

General Questions

Q1: What is COMMA?

A: COMMA is a restaurant Point of Sale (POS) system that helps you manage orders, tables, menu items, payments, and view business analytics.

Q2: Who uses COMMA?

A: Cashiers create orders and process payments. Managers oversee operations and view reports. Administrators manage users and system settings. Customers order via QR codes.

Q3: What payment methods does COMMA accept?

A: Cash, credit/debit cards, digital wallets (Apple Pay, Google Pay), and online payment processing.

Q4: What currency does COMMA use?

A: Currently set to ILS (Israeli Shekel). Administrators can adjust in settings.

Q5: Is COMMA available in Arabic?

A: Yes! You can toggle between English and Arabic using the language button in the top menu.

Q6: Can I use COMMA on my phone?

A: Yes, for customers to order via QR. Staff use the web version on computers.

Q7: Does COMMA work offline?

A: No, COMMA requires internet connection to function.

Q8: How do I backup my data?

A: System automatically backs up data. Contact administrator for specific backup details.

Order & Payment Questions

Q9: How do I create an order?

A: Click Orders → Create Order → Select order type → Add items → Process payment.

Q10: Can customers order from tables?

A: Yes! They scan QR code at table and order directly from their phone.

Q11: What if customer wants to cancel order?

A: If order not started: delete it. If in progress: contact kitchen. If completed: process refund.

Q12: How do I process a refund?

A: Find original order → Click Refund → Enter refund amount → Refund returns to original payment method.

Q13: Can I accept partial payments?

A: Yes, you can process payment in installments, though system typically handles full payment at once.

Q14: What if customer loses their receipt?

A: You can reprint anytime from Receipts page using receipt number, date, or customer details.

Q15: Can I change a price after order created?

A: No, prices lock when order placed. For future orders, edit in menu settings.

Menu & Item Questions

Q16: How do I add new menu items?

A: Menu → Add Item → Fill details → Select category → Save. Item appears in menus.

Q17: Can I have item variants (sizes)?

A: Yes! Edit item → Add Variant → Set name and price adjustment (e.g., +5 ILS for large).

Q18: What are add-ons?

A: Extras customers can add for extra cost (e.g., extra shot in coffee = +3 ILS).

Q19: How do I temporarily hide a menu item?

A: Edit item → Toggle "Active" OFF → Save. Item won't appear in menus.

Q20: Can I upload item images?

A: Yes! When creating or editing item, upload image. Improves customer ordering experience.

Table & Shift Questions

Q21: How do I manage tables?

A: Tables → Create/Edit/Delete tables. Set capacity, location, and status.

Q22: What does table status mean?

A: **Available** = empty and ready. **Occupied** = customers using it. **Reserved** = saved for later.

Q23: How do I open a shift?

A: Shifts → Open Shift → Enter opening cash amount → Open.

Q24: How do I close a shift?

A: Close Shift → Enter actual cash count → System calculates difference → Close.

Q25: What if cash doesn't match at end of shift?

A: Document the variance, report to manager. Common causes: change mistakes, missing transactions.

Reports & Analytics Questions

Q26: How do I view daily report?

A: Reports → Daily Reports → Select date → View. Shows revenue, orders, payment breakdown.

Q27: Can I export reports?

A: Yes! Click "Export PDF" on any report. Downloads to your computer.

Q28: How far back can I view reports?

A: From system start date. System stores all historical data.

Q29: What does "Average Order Value" mean?

A: Total revenue divided by number of orders. Example: 3,500 ILS ÷ 42 orders = 83 ILS per order.

Q30: How often do reports update?

A: Automatically as orders complete. Dashboard updates in real-time.

Settings & Administration Questions**Q31: How do I change business information?**

A: Settings → Business Information → Update details → Save.

Q32: How do I customize receipts?

A: Settings → Receipt Settings → Add logo, footer text, etc. → Save.

Q33: How do I adjust tax rate?

A: Settings → Financial → Set tax percentage → Save. Applies to future orders.

Q34: Who can create user accounts?

A: Only administrators can create, edit, or delete user accounts.

Q35: How do I change my password?

A: Settings → Account → Change Password → Enter current password → Enter new password → Save.

Troubleshooting Questions**Q36: Payment failed, what do I do?**

A: Check internet, verify amount, try again. If still fails, use different payment method or try later.

Q37: Receipt printer won't print

A: Verify printer is on and connected. Check paper loaded. Restart printer if needed.

Q38: Order total seems wrong

A: Check item prices, quantity, tax percentage, and discounts. Contact manager if error found.

Q39: System is running slowly

A: Check internet speed. Close extra browser tabs. Refresh page. Try different browser.

Q40: I don't have permission to do something

A: Your user role limits access. Ask your manager or administrator for elevated permissions.

BEST PRACTICES**For Cashiers****Creating Orders:**

- Verify all items are correct before finalizing
- Ask customer about add-ons and preferences
- Use special request notes for customizations
- Double-check quantities
- Always confirm total with customer

Processing Payments:

- Always give correct change for cash
- Verify payment amount entered is correct
- Keep receipts organized
- Reconcile drawer at shift end
- Report discrepancies to manager

Printing Receipts:

- Print immediately while customer is at counter
- Check receipt prints clearly
- Give to customer while warm (shows professionalism)
- Keep backup receipt (if needed)

Maintaining Accuracy:

- Scan items when available
- Spell customer names correctly
- Use consistent table numbers
- Record special requests accurately
- Note any issues for manager

For Managers**Daily Operations:**

- Review dashboard at start of day
- Monitor peak hours for staffing
- Check top-selling items
- Monitor payment methods
- Address any issues immediately

Menu Management:

- Keep menu current and accurate
- Remove unavailable items promptly
- Test new items before launch
- Monitor seasonal items
- Update prices as needed
- Remove low-selling items

Staff Management:

- Train staff on proper procedures
- Review reports regularly
- Provide constructive feedback
- Monitor shift accuracy
- Handle customer complaints professionally

Financial Management:

- Open shift accurately
- Close shift carefully
- Count cash accurately
- Investigate variances
- Review daily reports
- Track trends over time
- Monitor payment methods

Customer Service:

- Empower staff to solve problems
- Honor refund requests when appropriate
- Maintain clean environment
- Ensure food quality
- Build customer relationships

Data Accuracy Best Practices

Preventing Errors:

1. **Double-check everything** before saving
2. **Don't rush** through order creation
3. **Ask for clarification** if uncertain
4. **Use system consistently** - same approach each time
5. **Train properly** - ensure all staff understand

Handling Mistakes:

1. **Identify immediately** when error found
2. **Document the issue** - when, what, why
3. **Correct if possible** - process refund, reorder, etc.
4. **Report to manager** - keep them informed
5. **Prevent future issues** - adjust process if needed

Security Best Practices:

1. **Never share login credentials**
2. **Logout when leaving** computer unattended
3. **Use strong passwords** - mix letters/numbers
4. **Change password regularly** - every 90 days
5. **Report suspicious activity** to administrator

Inventory Best Practices:

1. **Monitor stock levels** - note running low items
2. **Use reports** to identify popular items
3. **Order more of bestsellers** - avoid stockouts
4. **Remove slow items** - reduces waste
5. **Seasonally adjust** - menu reflects availability

GLOSSARY

Business Terms

Add-on / Extra

An optional item customers can add to their order for an additional cost. Example: extra shot of espresso (+3 ILS).

Average Order Value

The average amount each customer spends. Calculated by: Total Revenue ÷ Number of Orders.

Dine-In

Customer eating at a table in your restaurant.

Delivery

Food delivered to customer's home or location.

Discount

Money off the order. Can be fixed amount (e.g., -5 ILS) or percentage (e.g., -10%).

Invoice

Official record of a payment transaction. Shows what was paid for and how much.

Menu Item

A product you sell (e.g., Cappuccino, Sandwich).

POS (Point of Sale)

The system that processes orders and payments. COMMA is your POS system.

QR Code

Square barcode that stores table information. Customers scan with phone to access menu.

Receipt

Physical or digital proof of payment. Shows what was bought and how much paid.

Revenue

Money made from selling items.

Service Charge

Extra percentage added to order for service. Example: 10% service charge.

Takeaway

Customer purchasing food to eat elsewhere (not at a table).

Tax

Government-required percentage added to order. Example: 17% VAT.

Variant

A version of an item with different characteristics. Example: Coffee sizes (Small/Medium/Large).

Void

To cancel or remove an item from an order.

System Terms**Active / Inactive**

Active = item is available for ordering. Inactive = item is hidden from menus.

Dashboard

Main screen showing overview of daily business metrics.

Filter

Tool to narrow results (e.g., show only cash payments).

Log In

Enter username and password to access the system.

Password

Secret code to access your account (never share!).

Refresh

Reload page to get latest data.

Role

Your position type (Cashier, Manager, Admin) which controls what you can do.

Session

The time period from login to logout.

Shift

Work period from opening to closing (e.g., 8 AM to 8 PM).

Status

Current state of something (e.g., order status = "Open").

Sync / Synchronize

System updating all locations with latest data.

Transaction

A single buy/sell event (one order placed and paid).

Validate / Validation

System checking that information is correct before saving.

Order Status Terms**Open**

Order created but not started yet.

Confirmed

Order received and acknowledged by kitchen.

Preparing

Kitchen actively making the order.

Ready

Food is prepared and waiting to be delivered.

Completed

Customer received food (not necessarily paid yet).

Paid

Order fully paid for. Receipt generated.

Cancelled

Order cancelled before completion. Money refunded if paid.

Refunded

Money returned to customer.

Role Terms**Admin (Administrator)**

Person with full system access. Creates users, changes settings, troubleshoots issues.

Cashier

Employee who creates orders, processes payments, and prints receipts.

Manager

Supervisor who oversees operations, manages menu/tables, and reviews reports.

SUPPORT GUIDE

Getting Help

For Technical Issues:

1. Check the Troubleshooting section in this guide
2. Try refreshing the page
3. Try logging out and back in
4. Try a different browser
5. Contact your manager or administrator

For Usage Questions:

1. Check this guide's appropriate section
2. Check the FAQs
3. Ask a colleague who knows the system
4. Ask your manager
5. Contact system administrator

When Contacting Support, Provide:

1. **Your Name & Role** - Who you are and what you do
2. **What You Were Doing** - What action you were taking
3. **What Went Wrong** - Describe the problem
4. **Error Message** - Any message shown on screen
5. **When It Happened** - Date and time
6. **How to Reproduce** - Steps to recreate the issue
7. **Screenshot** - If possible, take a screenshot showing the issue

Example:

"Hi, I'm Ahmed, a cashier at COMMA. This morning at 10:30 AM, I tried to print a receipt after a payment (Order #1234, Table 5, 85 ILS cash payment). The receipt printed but with partial text - right half was cut off. This has happened 3 times this week. The printer is an Epson TM-T20. Can you help?"

Before Contacting Support, Check:**For Payment Issues:**

- Is internet connection working?
- Is payment amount correct?
- Have you tried the payment again?
- Have you tried a different payment method?

For Receipt Issues:

- Is printer turned on?
- Is printer connected to network?
- Is receipt paper loaded?
- Have you tried restarting printer?

For Login Issues:

- Is Caps Lock off?
- Is username/password spelled correctly?
- Have you waited 15 minutes (after locked account)?
- Is internet working?

For Slowness:

- Is internet speed adequate?
- Are other apps running?
- Have you cleared browser cache?
- Have you tried a different browser?

Common Support Topics

Password Reset

- Contact your manager or administrator

- They can reset your password
- You'll set new password on next login
- Never share passwords, even with administrators

Permission Issues

- You don't have access to a feature
- Your manager or admin must grant permissions
- Depends on your role (Cashier, Manager, Admin)
- Ask what permissions you need and why

Data Issues

- Missing or incorrect data in system
- Administrator can investigate
- May need to correct data manually
- Provide exact details of discrepancy

System Errors

- Unexpected error messages
- System crashing or freezing
- Pages not loading
- Contact administrator with error message

EXECUTIVE SUMMARY

COMMA System Overview (10-Minute Understanding)

What is COMMA?

COMMA is a restaurant management system that handles orders, payments, receipts, menu management, and business analytics.

Who Uses It?

- **Customers:** Order via QR code on their phone
- **Cashiers:** Create orders, process payments, print receipts
- **Managers:** Oversee operations, manage menus, view reports
- **Admins:** Control entire system and users

Three Main Activities:

1. ORDERING

- Customers scan QR code → select items → place order
- Or cashier creates order at counter
- Order goes to kitchen immediately
- Kitchen prepares food

2. PAYMENT

- Customer pays (cash/card/wallet)
- Amount recorded
- Receipt prints automatically
- Change calculated automatically

3. BUSINESS INSIGHTS

- Dashboard shows daily sales
- Reports show weekly/monthly performance
- Track top items, revenue, customers
- Make data-driven decisions

Key Features at a Glance:

Feature	What It Does	Who Uses It
QR Ordering	Customers order from table	Customers
Dine-In/Takeaway	Different order types	Cashiers
Multiple Payments	Accept cash, card, wallet	Cashiers
Receipts	Generate and print receipts	Everyone
Menu Management	Update items and prices	Managers
Table Management	Manage seating	Managers
Reports	View business metrics	Managers
Shift Management	Track work shifts	Managers
Analytics	Understand performance	Managers

Day-in-the-Life Example:

Manager Ahmed (8 AM - 5 PM):

1. Opens shift (500 ILS starting cash)
2. Checks dashboard (previous day's metrics)
3. Manages staff and operations
4. Updates menu (removes sold-out items)
5. Monitors orders during day
6. Reviews reports at midday
7. Closes shift at end (counts cash, reviews daily performance)
8. Completes daily reconciliation

Cashier Maria (10 AM - 2 PM):

1. Logs into system
2. Creates 10+ orders from customers
3. Processes payments (various methods)
4. Prints receipts
5. Handles customer requests
6. Answers menu questions

Customer Hassan (12:30 PM - 1:15 PM):

1. Sits at Table 5
2. Scans QR code
3. Browses menu (categories, items, prices)
4. Selects 2 cappuccinos, 1 sandwich
5. Reviews total (75 ILS)
6. Places order
7. Waits for food
8. Receives food from server
9. Eats

Three Must-Know Workflows:

1. **QR to Order (3 min)**
Scan QR → Browse → Select → Order → Kitchen receives → Food made → Served
2. **Counter Order (5 min)**
Arrive → Tell cashier → Order created → Payment → Receipt → Food made → Depart
3. **Daily Management (8 hours)**
Open shift → Monitor operations → Process orders → Review reports → Close shift

Critical Success Factors:

1. **Accuracy** - Correct items, quantities, prices
2. **Speed** - Quick order processing and payment
3. **Consistency** - Same process every time
4. **Communication** - Clear kitchen instructions
5. **Reconciliation** - End-of-day cash accuracy

Getting Started Checklist:

- ☐ Receive login credentials
- ☐ First login and change password
- ☐ Understand your role (Cashier/Manager/Admin)
- ☐ Read relevant sections of this guide
- ☐ Practice with demo data if available
- ☐ Ask questions before going live
- ☐ Shadow experienced staff
- ☐ Confident to operate independently

Document Information

System: COMMA Café & Lounge POS System
